

November 21, 2005

Docket number TRI-2005-0073  
Environmental Protection Agency  
Mail Code 28221T  
1200 Pennsylvania Ave., NW  
Washington, DC 20460

Administrator Johnson and EPA staff,

I STRONGLY oppose the EPA's plans to change the reporting rules for the  
Toxics  
Release Inventory by allowing alternate year reporting and increased  
thresholds  
for the reporting of detailed chemical release information. It is simply  
UNACCEPTABLE  
that Americans would have to wait two years to receive updates about  
pollutants  
released in or near their communities. Companies could also use the rule  
change  
to pollute more during years they do not have to report. I cannot  
believe that  
you can sit there with a straight face and actually call yourself the  
"environmental  
protection agency". Get off your asses and do your damn jobs without  
kissing George  
W. "I hate the environment and love big business" Bush's ASS! The  
American taxpayer  
is paying you to do your damn job to keep our environment safe - not  
sell it out  
to polluters!!!!

Reject the changes to the TRI program and preserve the public's right to  
know  
about dangerous chemicals in our communities.

Sincerely,

christine lininger
